Celebrating its 20th year in Northern Virginia, Home Specialty is an award-winning home decor store like no other. The Bakers have a finely-tuned expertise across an unparalleled spectrum of goods under one roof. From fine furniture and lamps, framed artwork and florals to exquisite locksets, copper weathervanes, bath accessories, stone water features and a truly incredible array of cabinet hardware, people come to Home Specialty for the constantly changing mix of goods.

The Baker's first store opened in Reston in 1996, followed by a second in Leesburg in 2004 in Great Falls, 3-1/2 miles west of the Beltway. “Discerning homeowners, decorators and designers, custom homebuilders, remodelers and those just looking for unusual gifts, are the people we've come to know as friends through

the years,” says Lynn Baker. “They need someone they can trust to quickly grasp the scope, scale and caliber of a project and complete it on time and within budget.”

The store maintains a loyal following with uncommon service, competitive pricing and that hard-to-find product mix that Wayne developed over the years as national sales manager and later as VP of Baldwin Hardware. “Success with Baldwin back then required an attention to detail that was extraordinary. Locksets were built by components from a vast array of choices to exact specifications,” he says. “We've built our business on that same formula that is contrary to the trending paradigm that narrows product selection for simplicity.” This store is a “must-see” for homeowners seeking quality elements to express their individual character through the fine fixtures and furnishings for their homes.
